To Our Valued Customers:

During these uncertain and turbulent times, A. B. Tools has the health and safety of our crew and community in the forefront of our minds. We are practicing safe social distance, as well as ensuring that all of our employees are utilizing proper cleanliness and sanitization. The State of California and Placer county, in which we operate, have issued shelter-in-place directives exempting essential businesses. We have received many notifications from medical, government, defense and construction customers stating that A. B. Tools products are essential to their continued operations. We plan to stay open at this time, and keep up production to continue to support their requirements.

We will continue to monitor this fast-moving situation to ensure that we are taking appropriate actions, and will update as necessary.

As always, thank you for your business!

Jon Baker, President
